

Technology Integration Services

Synergetics DCS, inc. provides Technology Integration Training and Services to school districts. These services can be provided through:

1. **Full or half day training courses** – Participants attend these services outside of instructional classroom times as a designated professional development in service.
2. **Technology Facilitator Services** – An Educational Technologist will work with teachers during planning periods to demonstrate ways to utilize technology and develop technology rich lesson plans. The Educational Technologist can also assist the classroom teacher during classroom instruction to implement technology rich lesson plans with his/her students.

These services can be customized to the specific needs of the school or district and include:

- **LCD Projectors** – Teachers learn how to utilize projectors as a teaching tool to extend lessons for both whole and small group settings.
- **Document Cameras** – This technology will be utilized for a variety of teaching and learning purposes where teachers can model instructional methods for students. Teachers will learn how to save digital images for review and remediation of instruction.
- **SMART Board Technologies** – Teachers will be instructed in utilizing the Notebook software that is part of the SMART Board Lessons to develop dynamic and interactive lessons in the classroom. We also provide in-depth training on SMART Response and SMART Tables. Training can be customized to meet the academic and grade level needs of the learners.
- **Web 2.0 Teaching Tools** – Interactive web based technology allows teachers to implement critical thinking, creativity and innovation into all core curriculum subject areas. Training in this area will assist teachers in utilizing free web based instructional tools that will enhance classroom instruction for all learning styles.

Training services will also show teachers how all of these component pieces can be used to create a 21st Century Learning Environment into all core curriculum subject areas. These services will assist the teachers in aligning core curriculum objectives with technology into the classroom for daily instructional use.
